BMC is alerting users to a problem with the installation documentation for version 10.1.00 of the following Administrative Products for DB2® products:

- ALTER for DB2
- CATALOG MANAGER for DB2
- CHANGE MANAGER for DB2
- DASD MANAGER PLUS for DB2

**Issue**

The installation documentation incorrectly indicates that you must run the `prdUPn#0` upgrade jobs from `HLQ.UDBCNTL` when migrating version 10.1 of the Administrative products. However, you should not run the upgrade jobs when you are migrating the following modes of the IBM® DB2 Universal Database™ for z/OS® subsystem:

<table>
<thead>
<tr>
<th>From</th>
<th>To</th>
</tr>
</thead>
<tbody>
<tr>
<td>Version 8 NFM</td>
<td>Version 10 CM8</td>
</tr>
<tr>
<td>Version 9 NFM</td>
<td>Version 10 CM9</td>
</tr>
</tbody>
</table>

**Resolution**

The following installation documents will be corrected:

- Administrative Products for DB2 Installation Guide
- Administrative Assistant for DB2 Installation Guide
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.

NOTE
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
