COPY PLUS for DB2®

Version 10.1.00
November 3, 2011
Tracking ID QM001724899

A serious problem in the COPY PLUS for DB2® product requires immediate attention.

Issue

When all of the following conditions exist, COPY PLUS might fail to copy DSNDB06.SYSCOPY:

- You specify the COPY PLUS command COPY DB2CATALOG … EXCLUDE DSNDB06.SYSCOPY.
- You follow the command above with another COPY command that specifies DSNDB06.SYSCOPY as the first space to copy.

When these conditions are met, COPY PLUS incorrectly applies the EXCLUDE from the first COPY command to both COPY commands, effectively bypassing the copy of DSNDB06.SYSCOPY.

Resolution

PTF BPU4306 resolves this issue.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. However, you can also obtain them from eFix PTF Distribution Services (eFix); you can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.

NOTE
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
