BMC is alerting users to a problem in the following products:

- APPTUNE for DB2® version 10.1.00
- MainView for DB2 version 10.1.00
- Pool Advisor for DB2 version 10.1.00

These products are also components in the following solutions:

- SQL Performance for DB2 version 10.1.00
- System Performance for DB2 version 10.1.00

**Issue**

The z/FS files where the DOM option sets and APPTUNE filters are stored become unavailable when the logical partition (LPAR) that the z/FS file system is mounted on undergoes an initial program load (IPL). This situation might also occur if the DB2 Component Services (DBC) that owns the z/FS files becomes unavailable.

The current implementation requires a series of manual steps to make the z/FS files available on an alternate LPAR. These steps are difficult to implement if you are using a “rolling IPL” approach to applying maintenance.

**Resolution**

PTF BPJ0520 resolves this issue by implementing a fail-over capability.

The new fail-over capability that is implemented by applying the PTF removes the use of z/FS files by storing the DOM option sets and APPTUNE filters in a Runtime Component System (RTCS) private registry.
Where to get the latest product information

NOTE

There is HOLD ACTION associated with this PTF that is critical.

For more detailed information, search the Knowledge Base for article KA360031. This knowledge article includes the steps that you need to take to successfully implement the PTF. You can access the Knowledge Base directly at https://kb.bmc.com/infocenter or from the BMC Support Central website (http://www.bmc.com/support).

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site.

NOTE

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
