BMC is alerting users to a problem in the Log Master for DB2® product.

**Issue**

Log Master might fail to process log records that a LOAD LOG YES event generates for a partition-by-growth (PBG) table space. The error occurs when LOAD LOG YES causes the allocation of the next partition in the PBG table space. Log Master does not process the page format records associated with the new partition correctly and does not produce the equivalent INSERTs for that partition.

**Resolution**

The following table lists the PTFs that resolve this issue:

<table>
<thead>
<tr>
<th>Log Master version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.2.00</td>
<td>BPU4758</td>
</tr>
<tr>
<td>10.1.00</td>
<td>BPU4759</td>
</tr>
</tbody>
</table>

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.

NOTE
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
