BMC is announcing the following new documentation for all BMC products and solutions for the IBM® DB2® environment:

- Installation System User Guide
- BMC Products and Solutions for DB2 Configuration Guide

These common guides replace individual product and solution installation guides.

The Installation System User Guide contains:

- Requirements and considerations for installing products
- Materials to help you prepare for installation, including worksheets to record the information you will need during installation and customization
- Instructions for downloading, installing, and customizing products

The BMC Products and Solutions for DB2 Configuration Guide explains how to perform product-specific configuration after you finish installation.

For BMC products and solutions for DB2, these new guides replace all of the following documents:

- Administrative Assistant for DB2 Installation Guide
- Administrative Products for DB2 Installation Guide
- Backup and Recovery Products for DB2 Installation Guide
- BMC Products and Solutions for DB2 Installation Planning Guide
- Database Administration for DB2 Installation Guide
- Database Performance for DB2 Installation Guide
- EXTENDED BUFFER MANAGER and SNAPSHOT UPGRADE FEATURE Installation Guide
- Recovery Management for DB2 Installation Guide
- System and SQL Performance for DB2 Installation Guide
- Utility Products for DB2 Installation Guide
