BMC is alerting users to a problem in the following products:

- APPTUNE for DB2®
- SQL Performance for DB2®

**Issue**

When you are monitoring DB2 Version 10 and APPTUNE object collection is active, in very rare situations, an address space that is attached to DB2 might

- Produce and recover from an abend 0C6 in module IODXAOBJ during or soon after APPTUNE unload processing — possibly accompanied by message BMC23333
- Consume higher CPU time and have longer elapsed time than expected

**Resolution**

PTF BPU4733 resolves this issue.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.
Where to get the latest product information

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site.

**NOTE**

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
