A serious problem in the Log Master for DB2® product requires immediate attention.

**Issue**

Log Master might ignore data when all of the following conditions exist:

- You are using a column-level filter predicate.
- You issued a column-level ALTER that versions the table.
- The scan range contains versioned rows that do not reflect the current version.

**Resolution**

Table 1 lists the PTFs that resolve this issue.

<table>
<thead>
<tr>
<th>Version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.2.00</td>
<td>BPU5011</td>
</tr>
<tr>
<td>10.1.00</td>
<td>BPU5010</td>
</tr>
</tbody>
</table>

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.

NOTE
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
