MainView for DB2® and BMC System Performance for DB2

Version 10.1.00
September 4, 2012
Tracking IDs BPD3679, BPD3697, and SLN000015164467

BMC is alerting users to a problem in the following products:

- MainView for DB2®
- BMC System Performance for DB2

Issue

System S0D6-26 abends can occur when the following conditions exist:

- You are using the Thread Query Application.
- You have applied PTF BPD3679, which became available on July 5, 2012, and is included on PUT1202A. This PTF addressed a problem that caused high CPU usage when the Thread Query Application was retrieving large result sets.

For more information, see solution SLN000015164467 in the Knowledge Base. You can access the Knowledge Base directly at https://kb.bmc.com/infocenter or from the BMC Support Central website (http://www.bmc.com/support).

Resolution

PTF BPD3697 resolves this issue.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.

NOTE

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
