BMC is alerting users to a problem in version 10.1.00 of the Pool Advisor for DB2® product. Pool Advisor is also a component of version 10.1.00 of the System Performance for DB2® solution.

**Issue**

After you apply BMC PTF BPU4829, the product generates incorrect trigger alerts and might fail to write long-term history records.

---

**NOTE**

Although BPU4829 addressed an issue that is caused by having too many active buffer or group buffer pools, this current issue can occur whether or not you have a large number of pools.

---

**Resolution**

BPU4829 has been set to a hold status of PTF in error (PE) and is no longer available for download. BMC is developing a correcting PTF and will reissue this notice when the fix is available.

---

**NOTE**

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
