A serious problem in the following products requires immediate attention:

- APPTUNE for DB2
- SQL Performance for DB2

**NOTE**

BMC previously announced this problem in a flash dated September 6, 2013. A PTF to correct the problem is now available.

### Issue

A storage overlay might make the DB2 subsystem terminate abnormally if the following conditions apply:

- An active APPTUNE filter specifies a value of Y for both of the following options:
  - Resource-saving option, **Sample data with extrapolation**
  - Exception threshold option, **Exception-only roll-ups**
- Both of these options are in the same filter row.

### Resolution

PTF BPU6120 resolves this issue.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.
Where to get the latest product information

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site.

**NOTE**

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at [http://www.bmc.com/support](http://www.bmc.com/support). Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
