LOADPLUS for DB2® and REORG PLUS for DB2

Versions 10.1.00 and 10.2.00
December 13, 2014
Tracking IDs QM001812153 and QM001812154: LOADPLUS and REORG PLUS ignore PRO status

BMC is alerting users to a problem in the following products:

- LOADPLUS for DB2®
- REORG PLUS for DB2

**Issue**

Versions 10.1.00 and 10.2.00 of LOADPLUS and REORG PLUS ignore persistent read only (PRO) status for any object that is participating in a load or reorganization.

IBM® APAR PM95731 enables the new PRO restrictive status for DB2 Version 10; however, for the status to take effect on an object, you must specifically set this status by using the IBM REPAIR utility. Until a fix is available for this issue, BMC recommends that you do not set PRO status on an object against which you plan to run these utilities.

**Resolution**

The fix for this issue is pending. BMC plans to reissue this notice when the fix is available.

---

**NOTE**

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
