APPTUNE for DB2, SQL Performance for DB2, and BMC Performance for DB2 SQL

Version 11.1.00
February 20, 2014

In a rare situation where the APPTUNE collection routine cannot retrieve the SQL text, a 10-byte overlay of DB2 storage might cause DB2 to terminate

A serious problem in the following products requires immediate attention:

■ APPTUNE for DB2
■ SQL Performance for DB2
■ BMC Performance for DB2 SQL

Issue

In a rare situation, a 10-byte overlay of DB2 storage might cause DB2 to terminate. This problem has been known to occur when all of the following conditions exist:

■ When accessing IBM DB2 Version 11
■ When using a REXX stored procedure to reference a remote table using a three-part name
■ Where the APPTUNE collection routine cannot retrieve the SQL text

Resolution

PTF BPU6668 resolves this issue.

BMC strongly recommends that all users running the referenced product version apply the PTF.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see your product’s installation guide.
You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site.

**Note**
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
