REORG PLUS for DB2
Version 11.1.00
October 13, 2014
Tracking number QM001818387: REORG PLUS no longer calls DSNUTILB for partition rebalancing of a table-based partitioned object on IBM DB2 Version 11

BMC is announcing a change in the REORG PLUS for DB2 product.

REORG PLUS no longer calls DSNUTILB for partition rebalancing when the following conditions exist:

- You either specify REBALANCE or are using a DDLIN data set to rebalance partitions.
- You are reorganizing a table-based partitioned object.
- You are running on IBM DB2 Version 11 new-function mode.

To enable this enhancement, apply both of the following PTFs:

- BPJ0839
- BPU7042

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System documentation.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site. For information about eFix, see the online Help.

**Note**
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
