RECOVER PLUS for DB2
Version 11.1.00
October 6, 2014
Tracking number QM001858690: DSNUTILB might create incremental image copies containing out-of-order dictionary pages, leading to errors (such as abends and data loss) during recovery

A serious problem in the RECOVER PLUS for DB2 product requires immediate attention.

Issue

Incremental image copies of a table space defined with COMPRESS YES and TRACKMOD YES might contain out-of-order dictionary pages when the copy is made with DSNUTILB. After PTF BPU7134 is applied, a recovery that uses these incremental copies might back level a space map page, which can cause a number of errors, including data loss.

The following errors are known symptoms of this problem:

- BMC40511S POINTER RECORD NOT RESOLVED
- ABEND04E RC00C90101 DSNSMRS:5003
- ABEND04E RC00C90101 DSNICUMW:5003
- BMC40229W POSSIBLE PROBLEM IN OUTPUT SPACE IMAGE:
- BMC40506W SPACE MAP ON PAGE NUMBER X'n' INDICATES END OF MAP BEFORE PAGE NUMBER X'n'

Resolution

PTF BPU7272 resolves this issue.
BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System Reference Manual.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site. For information about eFix, see the online Help.

**Note**
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
