LOADPLUS for DB2
Version 11.1.00
January 20, 2015
Tracking number QM001797318: For a partition-by-growth table space, specifying LOAD REPLACE now converts rows that are in BRF to RRF

BMC is announcing a change in the LOADPLUS for DB2 product.

When the following conditions exist, LOADPLUS now converts rows of a partition-by-growth table space that are in basic row format (BRF) to reordered row format (RRF):

- You specify LOAD REPLACE.
- The value of the IBM DSNZPARM parameter RRF is ENABLED.

To enable this enhancement, apply PTF BPU7417.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System documentation.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site. For information about eFix, see the online Help.

Note
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support. Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
