RECOVER PLUS for DB2
Version 10.1.00 and 11.1.00
March 30, 2015
Tracking number QM001874873: After a backout recovery of a universal table space (UTS), subsequent inserts might fail with 00C90218

BMC is alerting users to a problem in the RECOVER PLUS for DB2 product.

Issue

After a backout recovery of a universal table space (UTS) in which space map segment entries are deallocated, subsequent reuse of the segment entry can fail with reason code 00C90218.

Resolution

The following table lists the PTFs that resolve this issue:

<table>
<thead>
<tr>
<th>Version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.1.00</td>
<td>BPU7609</td>
</tr>
<tr>
<td>11.1.00</td>
<td>BPU7610</td>
</tr>
</tbody>
</table>

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System documentation.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site. For information about eFix, see the online Help.

Note

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
Workaround

As a workaround, you can execute a forward recovery of the affected table space to current.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support.

Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
