BMC is alerting users to a problem in the Log Master for DB2 product.

**Issue**

Some Log Master repository tables have columns that contain internally mapped structures. The online interface in version 11.2.00 of Log Master incorrectly maps some of these columns. Consequently, the following errors might result:

- BMC097478S internal error messages
- S0C4 ABENDs
- Incorrect data display

These errors might occur when you use the online interface to do the following:

- Perform work ID maintenance
- Generate JCL

**Resolution**

PTF BPU7975 resolves this issue.

*Note*

You must recreate any work IDs that you created with version 11.2.00 of Log Master before you applied PTF BPU7975.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the *Installation System Reference Manual*.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site. For information about eFix, see the online Help.
Note
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support.

Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
