Serious problems in the following products require immediate attention:

- Versions 9.3.00 and 9.4.00 of BMC CDB/Auto-Online Reorg for DB2 for z/OS
- Version 11.2.00 of BMC Next Generation Technology Reorg for DB2 for z/OS (NGT Reorg)

**Note**
With version 11.2.00, the name of BMC CDB/Auto-Online Reorg for DB2 for z/OS changed to BMC Next Generation Technology Reorg for DB2 for z/OS (abbreviated as NGT Reorg).

Also, note that BMC previously announced these problems in a flash dated June 3, 2015. PTFs to correct the problems are now available.

**Issue**

This flash addresses the following problems:

- Data loss might occur when the following conditions exist:
  
  — You are reorganizing a segmented table space.
  
  — A pending alter will change the table space to a universal table space (UTS) with LOBs.
  
  — The reorganization materializes the alter.

- For jobs created in version 9.3 of Auto-Online Reorg, attempting to run them in version 9.4 or in NGT Reorg 11.2 might cause a system abend S0C3 in module RWRT2IXM.
After running a job on version 9.4 or 11.2, you cannot restart that job on version 9.3. This restriction is a permanent product requirement.

**Resolution**

The following table lists the PTFs that prevent these issues from occurring:

<table>
<thead>
<tr>
<th>Product and version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>BMC CDB/Auto-Online Reorg, version 9.3.00</td>
<td>60</td>
</tr>
<tr>
<td>BMC CDB/Auto-Online Reorg, version 9.4.00</td>
<td>7</td>
</tr>
<tr>
<td>NGT Reorg, version 11.2.00</td>
<td>BPU7988</td>
</tr>
</tbody>
</table>

For BMC CDB/Auto-Online Reorg, use your standard method for obtaining fixes. If you need assistance, contact BMC Customer Support.

For NGT Reorg, BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the *Installation System Reference Manual*. You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site. For information about eFix, see the online Help.

Applying the PTF does not correct any table spaces that have already been affected. Identify potentially affected table spaces based on the information in “Issue” on page 1, and use your standard method to recover those table spaces.

**Note**

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
