Tracking number QM001889653: Stacking multiple archive logs on a tape volume might cause an error

BMC is alerting users to a problem in the following products:
- RECOVERY MANAGER for DB2
- PACLOG for DB2

Issue

Error IEC149I 813-04 can occur when the following conditions exist:
- The archive log copy program, ARMBARC, made archive log copies.
- Multiple archive logs are stacked on a tape volume.
- At your disaster recovery (DR) site, a recovery attempts to open the .B copy of the Boot Strap Data Set (BSDS).

The problem occurs when you have file sequence numbers greater than 1, which can cause the data set names in the JCL to not match the data set names on the tape label.
