MainView for DB2
Version 11.1.00 and 11.2.00
November 20, 2015
Tracking number QM001890161: Users might experience a loop that causes very high CPU utilization when using the Active Thread applications

A serious problem in the MainView for DB2 product requires immediate attention.

Issue

A loop might occur in the BBP0U41A program, leading to very high CPU usage when Active Thread applications are used. This problem affects various views such as THDACTV and THDCICS.

The loop occurs because control blocks that are referenced by BBP0U41A were corrupted outside of MainView for DB2. (The corruption occurs in an IBM CICS region belonging to the IBM CICS DB2 Attachment Facility.)

Resolution

Apply the following PTFs:

<table>
<thead>
<tr>
<th>Version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>11.1.00</td>
<td>BPD4370</td>
</tr>
<tr>
<td>11.2.00</td>
<td>BPD4371</td>
</tr>
</tbody>
</table>

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System Reference Manual.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://efix.bmc.com or from the support site. For information about eFix, see the online Help.
Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support.

Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
