LOADPLUS for DB2
Version 11.1.00 and 11.2.00
September 16, 2016
Tracking number QM002032651: With PTF BPU8719 or BPU8720 applied, running LOADPLUS with an empty SYSREC might result in a corrupted space map page

A serious problem in the LOADPLUS for DB2 product requires immediate attention.

Issue

When the following conditions exist, LOADPLUS might corrupt the space map page, but complete without an indication of the problem:

■ You are loading a segmented or universal table space that is compressed.
■ Your input data set is empty (for example, when you specify SYSREC DD DUMMY).
■ At least one of the following PTFs is applied on your system:
  — (version 11.1) BPU8719
  — (version 11.2) BPU8720

A subsequent unload on this table space might not unload all rows.

Resolution

Complete the following procedure:

1. Apply the appropriate PTF:

<table>
<thead>
<tr>
<th>Version</th>
<th>PTF</th>
</tr>
</thead>
<tbody>
<tr>
<td>11.1.00</td>
<td>BPU9013</td>
</tr>
<tr>
<td>11.2.00</td>
<td>BPU9014</td>
</tr>
</tbody>
</table>
BMC recommends using BMC Internet Service Retrieval (BMC ISR) to obtain PTFs. For information about BMC ISR, see the maintenance information in the *Installation System Reference Manual*. You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://efix.bmc.com](http://efix.bmc.com) or from the support site. For information about eFix, see the online Help. If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

2 Correct any table spaces that were affected by the problem:

a Identify potentially affected table spaces based on the information in “Issue” on page 1.

b Reorganize the affected table spaces.
