BMC is announcing the availability of updated documentation for the BMC Log Analyzer *for IMS* product.

For the December 2015 release of this product, BMC provided release notes and online Help documenting the changes for that release. Now, BMC has also updated the product guides and manuals for that release; you can access them from the A-Z Supported Product List on the BMC Support Central website.

The December 2016 release of the BMC Documentation Center will also contain the updated documentation.
