BMC Utility products for DB2
Version 11.2.00
December 9, 2016
BMC Utility products for DB2 now support DB2 12

BMC is announcing support for Version 12 of the IBM DB2 for z/OS database management system.

Overview of the enhancement

The following products now support DB2 12 when you apply the PTFs listed in this technical bulletin:

■ CHECK PLUS for DB2
■ LOADPLUS for DB2
■ REORG PLUS for DB2
■ UNLOAD PLUS for DB2

After applying the PTFs, you can run these products on a DB2 12 subsystem; however, these products do not support any of the new DB2 12 features. BMC does not plan to support new features of DB2 12 or later in these products.

Note

If you plan to use any of the new features of DB2 12, BMC strongly suggests that you migrate to the corresponding BMC Next Generation Technology (NGT) utility.

Enabling the enhancement

Complete the following steps to enable this enhancement.

1. Apply the appropriate PTFs, as follows:

<table>
<thead>
<tr>
<th>Product</th>
<th>PTFs</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHECK PLUS</td>
<td>BPU8707 and BPU8789</td>
</tr>
</tbody>
</table>
BMC recommends using BMC Internet Service Retrieval (BMC ISR) to obtain PTFs. For information about BMC ISR, see the maintenance information in the *Installation System Reference Manual*.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://efix.bmc.com](http://efix.bmc.com) or from the support site. For information about eFix, see the online Help.

2 Ensure that version 12.1 of the BMC DB2 Solution Common Code (SCC) component is installed and available to the products that you plan to use.

3 *(strongly recommended)* Apply all maintenance from IBM and BMC.
   You can download BMC maintenance through the BMC ISR or eFix.
