February 23, 2017
The SCC component fails to build a new compression dictionary when IBM PTF UI43626 for IBM DB2 Version 11 is applied

A serious problem in the following products requires immediate attention:

- REORG PLUS for DB2
- LOADPLUS for DB2
- BMC Database Administration for DB2
- BMC Administrative Assistant for DB2
- Database Performance for DB2
- BMC Object Administration for DB2
- BMC High Speed Utilities for DB2
- BMC Performance for DB2 Databases

Note
BMC previously announced this problem in a flash dated February 17, 2017. A PTF to correct the problem is now available.

Issue

The DB2 Solution Common Code (SCC) fails to build a new compression dictionary when the following conditions exist:

- Compressed tables are being processed.
- A new dictionary needs to be built.
- You are using SCC version 11.1.00 or 12.1.00.
Note
The version of SCC you are using might be later than the one you installed initially. This is because the installed version is updated periodically with accumulated maintenance and enhancements. Some products use SCC indirectly if they are launched from within an associated solution.

■ The IBM PTF UI43626 for IBM DB2 Version 11 is applied.

This issue generates the following error message:

BMC50365S 2: LZ DICTIONARY BUILD ERROR. PARTITION = 0, RC = 12, REASON = 11
