BMC Application Accelerator for IMS™
Version 1.0.00
March 12, 2013

BMC is announcing the availability of PTFs for the BMC Application Accelerator for IMS™ product.

As a result of the Beta testing, PTFs were created after the product release. The PTFs must be applied during the installation of BMC Application Accelerator for IMS.

Use the following procedure to apply the PTFs during installation:

1. Obtain and start the Installation System.
   For instructions, see the Installation System User Guide.

2. On the BMC Software Installation Configuration Vn.n.nn Initial Menu, if needed, select the Setup New Customized Installation Library option, complete the displayed panels, and run the generated job to build the customized library.

3. On the BMC Software Installation Configuration Vn.n.nn Initial Menu, perform the following tasks:
   A. Select the Install and Customize Products and Solutions option.
   B. Type MSFON on the Command line.
   C. Press Enter.

   The MSFON command instructs the Installation System to process the PTFs during installation.

4. On the MSF Maintenance Service File panel, select option 1, Yes, and press Enter.

5. Proceed with the remainder of the installation process as described in the Installation System User Guide.
NOTE
If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.
