BMC Subsystem Optimizer *for zEnterprise*
Version 1.0.00
June 12, 2015

BMC is announcing an enhancement to the BMC Subsystem Optimizer *for zEnterprise* product.

**Overview of the enhancement**

Subzero now supports the IBM IMS Open Thread Environment (OTE). IBM issued APARs to enable OTE for IMS version 12 (APAR PI29194) and 13 (APAR PI29195).

**Enabling the enhancement**

PTF BPJ1058 enables this enhancement.

After you apply PTF BPJ1058, the setting that you specified for the IMS DFSPZPxx OPENTHRD parameter tells Subzero whether to use the IMS OTE feature. BMC Subsystem Optimizer *for zEnterprise* supports any setting.

---

**Note**

Review the documentation accompanying the IBM APARs, to identify any DFSPRP macro changes that might affect your processing environment.

---

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the *Installation System Reference Manual*.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://apps.bmc.com/support/efix.cgi](http://apps.bmc.com/support/efix.cgi) or from the support site. For information about eFix, see the online Help.

---
