BMC Subsystem Optimizer for zEnterprise
Version 1.0.00
July 21, 2015
Incorrect data might be returned when Subzero redirects a multi-row FETCH SQL statement

A serious problem in the BMC Subsystem Optimizer for zEnterprise product requires immediate attention.

Issue

Incorrect data might be returned when Subzero redirects a multi-row FETCH SQL statement for an end-user application program, and the FETCH statement retrieves NULL indicators for the columns.

The NULL indicators cause Subzero to inaccurately return the column data to the application program.

Resolution

PTF BPJ1078 will resolve this issue. BMC will be delivering BPJ1078 with co-requisite PTFs in maintenance bundle 13 (product version 1.0.00.13) on August 7, 2015.

The bundle identifier is PTF BPJ1097. If you have version 1.0.00.13 or later, no further action is required.

The following message in the Subzero address space identifies your product version:

BMCBRDD0002I BMC Subsystem Optimizer for zEnterprise version + 01.00.00.13 BPJ1097 (S007).

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the Installation System Reference Manual.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at http://apps.bmc.com/support/efix.cgi or from the support site. For information about eFix, see the online Help.
Note

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support.

Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
