BMC is alerting users to a problem in the BMC Intelligent Capping for zEnterprise product.

**Issue**

When PTF BQY0921 is applied, iCap displays incorrect entitlement values for the following fields on the NLPARGRP view:

- **LPAR/Group Def Entl** (the defined entitlement for an LPAR or group)
- **LPAR/Group Cost Entl** (the cost entitlement for an LPAR or group)

*Note*

The incorrect values do not affect the actual entitlements that iCap uses.

When you create or edit an iCap policy, the NLPARGRP view displays all of the LPARs and groups that are running on your system.

**Resolution**

PTF BQY0968 resolves this issue.

BMC recommends using BMC Internet Service Retrieval (ISR) to obtain PTFs. For information about ISR, see the maintenance information in the *Installation System Reference Manual*.

You can also obtain PTFs from eFix PTF Distribution Services (eFix). You can access eFix directly at [http://efix.bmc.com](http://efix.bmc.com) or from the support site. For information about eFix, see the online Help.
Note

If you have questions, contact Customer Support at 1 800 537 1813 (United States or Canada) or call your local support center.

Where to get the latest product information

To view the latest BMC documents, see the Support Central website at http://www.bmc.com/support.

Notices such as flashes, technical bulletins, and release notes are available on the website. You can subscribe to proactive alerts to receive e-mail messages when notices are issued or updated. For more information about proactive alerts, see the Support Central website.
